

Job description

Company Overview

Foto Owl AI is a cutting-edge technology company headquartered in Baner, Pune. We specialize in hyper-personal fan engagement, organic social media traction, advanced media asset management, and AI-powered real-time photo sharing. As an innovator in tech solutions, Foto Owl AI is dedicated to redefining personalized fan experiences and seamless media sharing for diverse applications.

Job Title: Junior Backend Developer

JobDescription

We are looking for a Junior Backend Developer to join our team in Pune. In this role, you will work on back-end web development and database management, contributing to the development of efficient and scalable systems that power Foto Owl's innovative platforms. You will collaborate with cross-functional teams to deliver high-quality solutions that support our mission to provide unparalleled user experiences.

Key Responsibilities

- Develop and maintain robust back-end systems for Foto Owl's platforms.
- Optimize database performance and scalability (SQL and NoSQL).
- Collaborate with the team to design and implement APIs and data flows.
- Debug and resolve technical issues with a problem-solving mindset.
- Ensure code quality through testing and best practices.

Required Skills

- Proficiency in Python programming.
- Back-End Web Development
- Knowledge of SQL and NoSQL databases
- Strong understanding of data structures and algorithms
- Analytical and problem-solving abilities
- Ability to collaborate and thrive in a team-oriented environment.

Qualification Assignment

Refer to the pdf as attached to the mail you received.

Complete the assignment and upload your code to your GitHub repository.

Submit the GitHub link to anushka.alandkar@fotoowl.ai OR hr@fotoowl.ai

You have to complete the assignment on or before 5 Jan 2026.
